

Ornamental bollards offer a decorative alternative to pedestrian and traffic control. These attractive bollards can define a pathway or control and direct vehicular traffic. Numerous options are available from surface mounting with anchor bolts to direct buried posts for maximum security. Powder coated chains are also available to connect the bollards for visual and functional applications.

Light the way with Illuminated Bollards designed to discreetly illuminate and direct traffic day or night. Custom machining of the illuminated neck allows a variety of light patterns and uses. When matched with Pelco's ornamental lighting and signage, illuminated bollards will give your project a complete coordinated appeal.
