Pelco Products, Inc. Announces New Hire for Ornamental Sales and Lighting Design Consultant

Pelco Products, Inc. is pleased to announce the hiring of Les Harness as Sales and Lighting Designer for its Campus Solutions and Downtown Solutions ornamental lighting product line. Harness has more than sixteen year's previous experience in the lighting design and consulting industries.

"This is a great opportunity for me. I have been impressed with Pelco Products and their product line for quite some time, and I'm proud to now be part of the Pelco team," said Les.

Harness' initial focus will be on signing, lighting, and safety consultation for university campuses and Main Street programs throughout Oklahoma. Les will also be instrumental in helping develop a regional and national expansion effort.

"Les's experience and can-do attitude are a valuable asset to Pelco," said Steve Parduhn, Vice President for Pelco Products, Inc. "We see the knowledge and experience Les brings to the table and are happy to have him as an integral part of the Pelco family," said Scott Talley, Ornamental and Utility Sales Manager.

In addition to Harness' previous experience in lighting consulting, he also brings a variety of honors and awards from the lighting industry, including serving on the board of the Illuminating Engineering Society of North America and as a member of the National Council of Qualified Lighting Professionals.
