Pelco Products, Inc. Announces Launch of Expanded Lighting Products

The lighting industry has changed significantly with the advent of LED technology. With that, Pelco saw the need to enhance and improve its entire line of lighting products to perfect existing models and add new ones.

“Pelco has manufactured and carried lighting products for many years. The reliability and popularity of LED luminaires is allowing us to add LED options to our entire lighting product line, which includes Decorative and Roadway lighting,” said Steve Parduhn, President/CEO of Pelco Products, Inc.

Pelco will continue to offer high-pressure sodium and metal halide luminaires along with the new variety of LED luminaires. “Pelco is proud to add very high-quality LED luminaires for outdoor lighting purposes- everything from campuses, developments, parks and roads – we have it all covered,” added Parduhn.

In addition to the new LED offerings, Pelco’s product line includes foundation solutions, poles, bases and many other accessory lines, making Pelco a one-stop shop for your product needs. Like the rest of the lighting line, Pelco will offer its products at affordable pricing and in a competitive time frame.

“Our lighting solutions will work for a customer’s specific applications. We work with municipalities, co-ops, neighborhoods, universities, contractors and businesses to ensure that every product is not only serving its purpose, but is also the ideal solution for every customer,” finished Parduhn.

Pelco’s new lighting product lines will be available for sale immediately and will feature a launch on the Utility and Traffic World of Pelco sites, which is the online interactive product resource for all the Utility and Traffic products that Pelco offers.
