**Pelco Products, Inc. Awarded ISO 9001:2015 Management Systems Certificate**

Pelco Products, Inc. in Edmond, Oklahoma is pleased to announce it has been awarded the ISO 9001:2015 Management Systems certification by the International Certifications USA Registrar for design and manufacture of Traffic and Utility Products.

Certified companies must demonstrate that they have implemented effective quality management systems across all areas of business, including facilities, people, training, services and equipment.

“ISO certification is based on a demonstration of our quality management principles including our strong customer focus, motivation and commitment of all Pelco employees as well as top management,” said Steve Parduhn, President/CEO of Pelco Products. “Our goal is to insure customers consistently receive high quality products and services. Pelco is committed to providing the highest quality traffic and utility products, but also innovative world-class traffic and utility products. Being ISO Certified means our customers can have confidence Pelco is committed to quality and outstanding customer service.”

ISO (International Organization for Standardization) is an independent, non-government international organization that registered and continually compliant companies adhere to for quality management and quality assurance. To be ISO registered, a company management system must conform to specific requirements and be audited by an accredited registration company.

“We are extremely proud of our team and their efforts to attain the ISO 9001 certification,” says Rick Vanesler, Quality Assurance Manager at Pelco Products, “it means that quality is what we produce. Our policies and procedures document that, but our people show it in how they work – and particularly in how they engage with our customers. ISO 9001 certification reflects our commitment to quality and our commitment to our customers.”

To learn more about how to become ISO certified visit [ISO.org](http://ISO.org).

Pelco Products, Inc. is an Oklahoma based, family-owned business specializing in designing, engineering, manufacturing and distributing traffic and utility products selling to all 50 states and multiple international markets.
