

# Anti-theft Copper Safe™ Cable Retainer

Patented

**Pelco's Cable Retainer is the *best* solution to help prevent copper/aluminum cable theft in Roadway Lighting and Traffic Poles:**

**1 It's Easy to Install**  
Pelco's cable retainer installs in just a few minutes, saving costly man-hours. Cables are easily locked in place. Clamping force exceeds 3,500 lbs. Conductor guide prevents access from hand holes to locking pads.

**2 It's Versatile**  
Pelco's cable retainers are available in a variety of sizes that can be used with most Roadway Lighting and Traffic Poles. Cables tested from 3/16 to 1/2 inch in diameter.

**3 It's Affordable**  
The Pelco Cable Retainer is very affordable, and certainly more economical than having to purchase new cable.

**4 It's Durable**  
Pelco's cable retainer is fabricated from heavy-duty, galvanized steel and stainless steel hardware for superior strength and longevity.

## Easy Installation:

◀ Each year, millions of dollars worth of cable are stolen. Our simple solution aids in preventing your area from being another victim!

# Protect the Public... And Your Investment with our Anti-Theft Cable Retainer

**Street light cable theft is a growing problem in the US. The Department of Energy reports \$1 billion in copper/aluminum theft annually:**

- Kansas City lost over \$500,000 of copper/aluminum due to street light copper/aluminum theft
- Central Kentucky lost over \$500,000 of copper/aluminum due to street light copper/aluminum theft

**Don't be the next victim! Purchase affordable, easy-to-install anti-theft cable retainers from Pelco Products, Inc.**
