

# The *Smart* Solution for Decorative Lighting

# Pelco's VersaPole™

Our engineers have combined smart hardware with versatility in our new **TMS (Track Mounting System)**. It allows accessories to be easily removed and installed while providing a decorative lighting solution to midblock areas.

Here are just a few industry leading features of the VersaPole™:

1

Fully customizable Track Mounting System

2

Accessories can be installed and adjusted in any position and easily removed

3

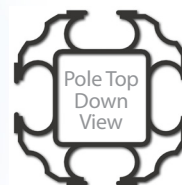

Wide variety of options and durable paint finishes

4

Designed for midblock street lighting and decorative poles

5

Provides wire protection with internal and external raceways

6

Suitable for many ITS (Intelligent Transportation Systems) applications

# The Pelco VersaPole™: Multiple Options Plus Added Functionality
