

# Pelco's Improved Sign Hangers

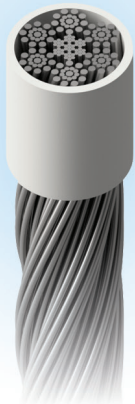

## Maximum Flexibility in High Wind

Pelco engineers have upgraded the design of our sign hangers by incorporating a cable to provide infinite degrees of freedom during high wind events.

**Here are just a few industry leading features of our Revised Sign Hanger Assemblies:**

**1**

Flexible up to 90° in extreme wind events without extender bar hardware failing

**2**

Rigid cable allows stability in lower wind speeds

**3**

Cable concept tested in 150 MPH winds

**4**

Adjustable extender bar and hardware

**5**

Assemblies can adapt to sheet or illuminated signs

Up to 90° Flexibility

# Pelco's Sign Hanger Assemblies Combine Strength with Wind Speed Flexibility.

## *Other Great Features Include:*

- *Infinite degrees of freedom for the sign assembly to flex*
- *This cable concept has been tested in 150 MPH winds in the FIU Wall of Wind supporting a traffic signal with NO failure.*
- *The cable is rigid enough to remain stable in lower wind speeds*
- *Improved design for higher wind events*
- *Flexible enough to bend 90 degrees in extreme wind events*
- *Available for free-swinging or rigid mount*
- *Durable hardware adapts for a variety of sign configurations*
- *Assemblies for both flat and internally illuminated signs*
