

Now *Hinged* for Easy Install & Adjustment Pelco's Astro-Brac™ Triton

Astro-Brac Triton now features a hinged saddle clamp and includes three cables for 50% increased holding strength over two cable brackets.

Astro-Brac Triton high tensile aluminum alloy clamp kits add strength with maximum adjustability and complete clamping versatility. They install easily with one tool and come complete with all necessary attaching hardware.

1

Features 600 ft. lbs. of rotational resistance. That's a **50% increase** over typical two cable brackets.

2

One tool for easy install and adjustability

3

Captive hardware included on hinge

4

The hinged saddle clamp attaches any 1-1/2" (1.9" OD) diameter pipe/tube

8

Corrosion resistant material

7

Minimum breaking strength: Stainless cable - 3700 lbs. Fits supporting structure between 4-1/2" to 22".

6

Accommodates (3) 3/16" stainless steel cables

5

Rotates 360° around the supporting arm or pole

360°

75°

Rotates 75° in either the vertical or horizontal mounting

Pelco's Astro-Brac Triton Series

Mounting Applications:

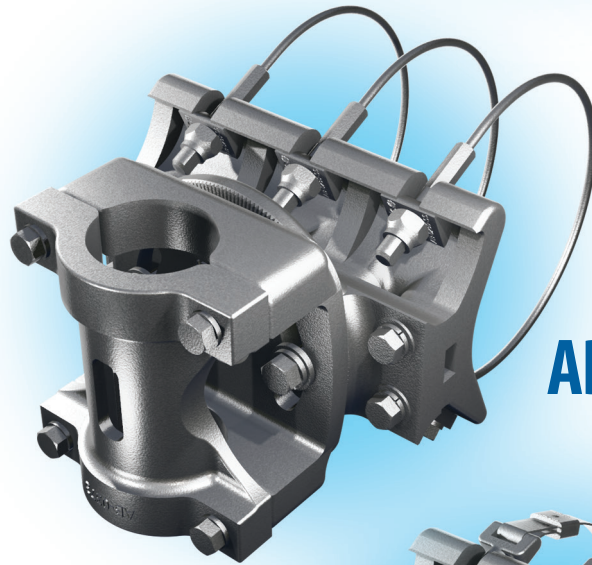

- *Cameras, Signs, Sensors, Antennas and Special Equipment*

Key Features:

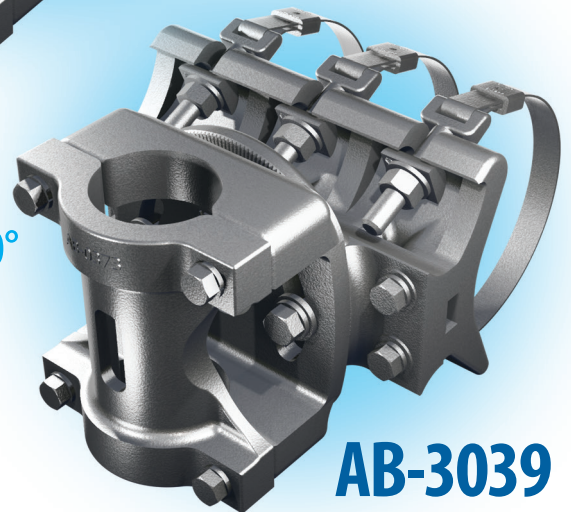

- *3 axis adjustability*
- *Stainless steel hardware*
- *Minimal standard tools to install/adjust*
- *Allows for through wiring of two (2) 5/8" diameter conductors*
- *Has 3 bands or cables for supporting added load*
- *AB-3050 is designed to be used with 1-1/2" (1.9" OD) diameter tube*
- *AB-3040 and AB 3039 are designed to be used with 2-3/8" diameter tube*
- *New captured bearing washer design to prevent rotation on cable*
